

BLUETOOTH® CONNECTIVITY FOR FIELD INSTRUMENTATION

Higher productivity, improved reliability, and increased safety.

Work smarter, faster, and more efficiently

Bluetooth® technology allows you to configure, maintain, or troubleshoot field instruments on-the-go to quickly perform rounds, resolve simple issues, and prioritize work to address what needs immediate attention.

- No physical connection needed
- No hot work permit
- No climbing tanks or scaffolding
- No guesswork

Higher Productivity

Bluetooth connectivity locates field devices and broadcasts encrypted data to handheld communication tools to help perform configuration tasks, get device status, and diagnose issues faster.

Improved Reliability

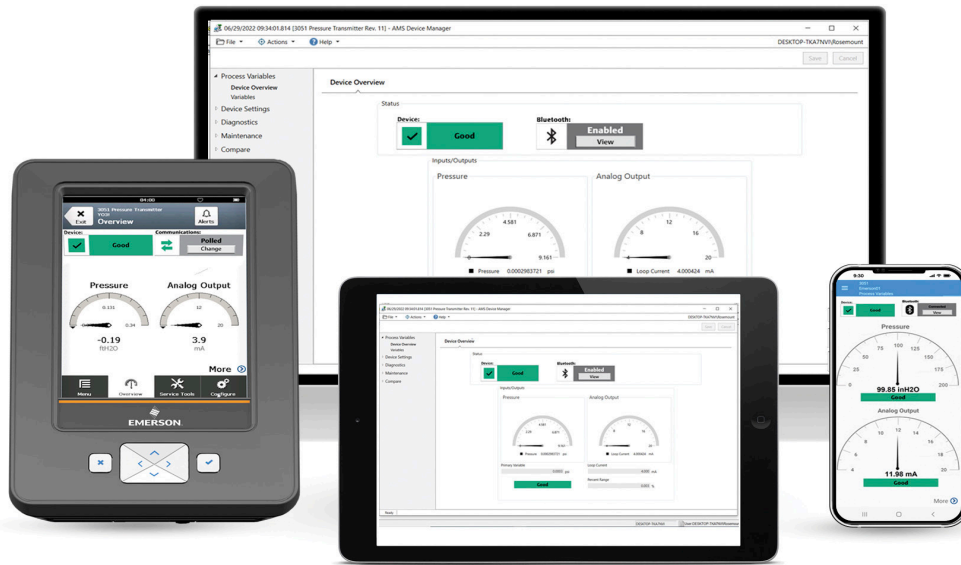

Field device internal components stay sealed and protected from unnecessary exposure to the environment, increasing the reliability of the device and the quality of your product.

Increased Safety

Access device information from a safe location, especially if installed out of reach, in congested areas or in hazardous locations with reduced equipment and less risk of injury to workers.

BLUETOOTH® CONNECTIVITY FOR FIELD INSTRUMENTATION

Menus use device descriptors to provide a consistent experience across communication tools and Emerson Automation Solutions products.

The AMS Device Configurator app interface

A few simple inputs, with included password protection, gets you up and running fast.

- Connects to devices 50 ft. (15 m) from the technician
- Encrypted data transfers with password protection
- Up to 10x faster than traditional HART®
- Familiar and streamlined user interface experience

Simplify and accelerate work with digital tools

MyEmerson's breadth of tools allows you to quickly engineer solutions, manage software and installed assets, collaborate with experts, and streamline procurement processes to achieve measurable improvement in speed and productivity.

The MyAssets component is a user-friendly digital tool that provides immediate access to up-to-date device documentation, replacements, spare parts and walkdown reports on millions of Emerson devices. MyAssets access is available directly from the AMS Device Configurator app with internet connection.
