Ultrasonic Level Transmitter

for Liquids

measuring • monitoring • analyzing

NUS-4

- Measuring Ranges:
  Liquids: Up to 25 meters (80 feet)
- Accuracy:
  ± 0.2 % of Reading
  ± 0.05 % of Full Scale
- p_{max}: 40 PSIG
  t_{max}: 194 °F
- Connection:
  1½" NPT, 2" NPT
  G 1½, G 2
  3", 5", 6" ANSI-Flange
  DN 80, DN 125, DN 150
- Housing Material: Aluminum
  Sensor Material: PP or PVDF
- Output Options: 4-20 mA, Relay, HART®, and Programming Unit with LCD Display

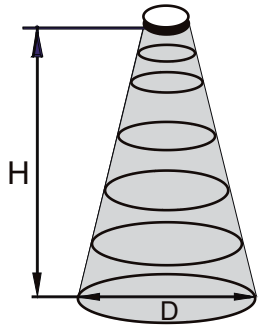
Description

The KOBOLD ultrasonic level sensor, model NUS-4, is used for non-contact, continuous level and volume measurement in tanks or for flow measurement in open channels. Ultrasonic level measurement is especially suited for applications where no physical contact can be established with the media's surface, such as with corrosive, contaminating, or adhesive media. The ultrasonic level sensing technology is based on the principle of measuring the time required for the ultrasound pulses to make a round trip from the sensor to the level to be measured and back. The sensor emits an ultrasonic pulse train and receives the echoes reflected. The compact, integrated electronic evaluates the echo time of the pulses and determines the level. For remote transmission, an analog signal output is available and for monitoring purposes, a relay contact is available. For programming and local display, an optional plug-in programming unit with LCD display is available. The sensors have a total beam angle of 5°-7° at -3 dB. This ensures a reliable measurement, even in process tanks with various protruding objects.

Conical Beam Diameter 'D'



H	NUS-4x04	NUS-4x06	NUS-4x08	NUS-4x10	NUS-4x15	NUS-4x25
1 m	0.15 m	0.14 m	0.18 m	0.16 m	0.21 m	0.27 m
2 m	0.25 m	0.23 m	0.30 m	0.25 m	0.30 m	0.39 m
4 m	0.46 m	0.40 m	0.54 m	0.42 m	0.47 m	0.64 m
6 m	-	0.58 m	0.79 m	0.60 m	0.65 m	0.88 m

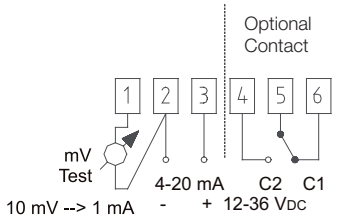
Electrical Connection



Technical Details

Measuring Principle:	Ultrasonic Principle, Echo Time Measurement
Frequency:	See Order Table
Beam Cone:	NUS-4x04: 6°, NUS-4x06, -4x10, -4x15: 5° NUS-4x08, -4x25: 7°
Delay Time:	10, 30, 60 Seconds; Programmable
Accuracy (at 20 °C):	± 0.2 % of Reading + 0.05 % of Full Scale
Resolution:	Depending on Measuring Distance <2 m: 1 mm 2 ... 5 m: 2 mm 6 ... 10 m: 5 mm >10 m: 10 mm
Mounting Position:	Vertical to the Product Surface
Process Temperature:	-22 ...194 °F (-30…90 °C)
Ambient Temperature:	-22 ... 158 °F (-30…70 °C) -13 ... 158 °F (-25…70 °C) (with Programming Unit)
Max. Pressure:	40 PSIG
Materials	
Housing:	Aluminum, Powder-Coated
Sensor/Connection:	Polypropylene or PVDF
Process Connection	
NUS-4x04:	1½" NPT, G 1½*
NUS-4x06, 4x08:	2" NPT, G 2*
NUS-4x10:	ANSI 3", DN 80
NUS-4x15:	ANSI 5", DN 100
NUS-4x25:	ANSI 6", DN 150
Electrical Connection:	2 x M20 x 1.5 Cable Gland Cable Diameter 6 ... 12 mm and 2 x ½" NPT Wire Cross Section: 0.5 ... 1.5 mm^2
Switching Output:	Relay (SPDT) 30 V_{DC}, 1A
Analog Output:	4 ... 20 mA (3.9 … 20.5 mA) Galvanically Isolated, Protection Against Surge Transients
Load:	Max. (Us – 11.4 V) / 0.02 A,
Power Requirement:	12 - 36 V_{DC}, 2-wire (Reverse Polarity Protected)
Display (Plug-in):	6-digit LCD-Display, Symbols and Bar Graph, PBT, Fiberglass Reinforced, Flame Proof
Protection:	Sensor IP 68, Housing: IP 67
Weight:	with Thread: approx. 2.5 lbs with Flange: approx. 5.6 lbs

*Note: G-thread with Counter-Nut and EPDM Gasket

Analog Output

Output: 4-20 mA, max. 600 Ω, HART® (optional).
The following can be programmed with keys:

- Assignment of the 4 or 20 mA Signals to the Required Levels
- Error Indication by the Current Output (3.8 mA, 22 mA or Hold the Last Value)
- Damping of Analog Output (10, 30, 60 sec.)

Factory Default:

- 4 mA: Assigned to the Minimum Level 0 %
- 20 mA: Assigned to the Maximum Level 100 %
- Error Indication by the Current Output: Hold Last Value
- Damping: 60 sec.

Relay Output:

The units may be optionally delivered with a relay output. When shipped without a programming unit, the NUS-4 is delivered in a 2-point switching state (tank empty – relay energized, tank full – relay de-energized). The following functions may be programmed with help of programming unit:

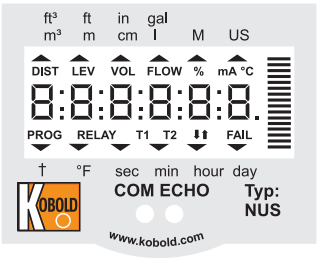
- 2-Point Switching for Monitoring of Level
- Error Signal in Case of Echo Loss
- Pulse Output for Volume Counting when Used as a Flow Meter

Programming Unit with LCD-Display:

The plug-in programming unit can be used to display the measured values during measurement and to change the program functions during programming. Two individual accessible programming modes may be chosen: quickset for quick programming of important parameters or full programming.

NUS-4 in Systems with PC:

Using a PC and a HART® modem (e.g. model HARTCOMM), it is possible to create your own multi-drop HART® network, where the PC displays all NUS-4 measurement data and also allows reprogramming of the units as necessary. The outputs derived from the displayed data can be programmed via the PC, which acts as the master. A maximum of 15 transmitters can be connected to one HART® modem and KOBOLD's NUS-NTB-NRM-SW software can be used for configuration.



Adjustable Functions with Programming Unit

- Engineering Units for the Display (US or Metric)
- Maximum Measuring Distance
- Value for 4 mA Output Signal
- Value for 20 mA Output Signal
- Error Type Indication of Analog Output
- Damping Time
- Selection: Distance Measurement, Level Measurement, Volume Measurement, Weight (when Density is Known), Flow Measurement in Open Channels
- Optimization of Measurement
- Linearization
- Close-End-Blocking
- Far-End-Blocking
- Direction of Level Change
- Selection of Pre-programmed 11 Tank Forms for Volume Measurement
- Selection of Pre-programmed 21 Measuring Channels for Flow Measurement in Open Channels
- Total Flow Amount Resettable
- Total Flow Amount Non-resettable
- Bar Graph Assigned to Analog Output or Echo
- Keyword Protection
- Simulation Mode
